## kWh Usage Estimate Worksheet

1. Enter the number of appliances you have in the NBR column.
2. Multiply the NBR column times the kWh column to get the amount in the TOT-kWh column.
3. To find the operating cost of your appliance, multiply the TOT-kWh column times 0.104 cents for amount in the COST column.
4. Total both the TOT-kWh and COST columns. These should compare to your average monthly bill.
